Dr. Karl Ehrlich
Vice President
Bacta-Pur®
97 Cove Street
New Bedford, MA 02744-2516

Dear Dr. Ehrlich,

For years, I had to address my plant's contributing role to the operational problems of our city's sewer system. As a food processor, we had to ensure our grease disposal was under control, but it was a never-ending problem, until now.

Thanks to the Bacta-Pur® BACTIVATOR, our grease problems with the City of New Bedford seem to be under control. Your new technology that activates bacteria on-site proved that we could fix our problem, stay in compliance and save money. Today we know we're not causing grease build-ups in the collection system and wet wells of down stream pumping stations.

The Bacta-Pur® BACTIVATOR system took up very little space and works continuously. It's one less thing the company has to worry about.

Thank you for making my job easier and the water a lot cleaner.

Sincerely,

A handwritten signature in cursive script that reads "George Borden".
