Dr. Karl F. Ehrlich  
IET-Aquaresearch Ltd.  
P.O. Box 2680  
North Hatley QC J0B 2C0

Dear Dr. Ehrlich:

On behalf of the Honourable Jim Prentice, Minister of the Environment, I am responding to your email message of November 12, 2009, with which you enclosed information on IET-Aquaresearch Ltd.'s Bacta-Pur System.

Environment Canada is pleased to learn of your company's efforts to improve environmental quality and building people-to-people relationships within Pakistan, through the joint marketing of the Bacta-Pur System and your local distributor, International Water Associates - Pakistan. The Department appreciates your kind words regarding the Government of Canada's support for the development of your company's technologies and products through the federal program for research and development tax credits.

The Department believes that proper sewer maintenance, enhanced wastewater treatment efficiency, and the corresponding reduction in energy consumption are among the most important elements leading to effective operation of sewerage systems. This contributes significantly to overall environmental protection. It is encouraging to know that various Canadian companies operating in this field, such as IET-Aquaresearch Ltd., are making progress in the development of technologies and products addressing this issue, both at home and abroad.

Please accept my best wishes.

Sincerely,

Ian Shugart
